

Rodent Treatment Preparation Sheet

Proper preparation is the key to getting great results from your rodent treatment. If you have any questions about an item listed below, don't hesitate to ask for clarification. We're here to help.

It is necessary that the resident/management company provide your technician with access to your home for treatment. If you're not available, please make arrangements for this access to be granted.

Treatment

Pre-Treatment

Your kitchen and bathroom are areas your technician will focus on. Please clean them and remove any clutter.

Remove all items from your lower kitchen cabinets, drawers, and the area beneath your kitchen sink.

Remove all items from under any bathroom sinks.

Temporarily store items from kitchen and bathroom cabinets in another room.

Remove all garbage and recycling from the residence.

Place pets in a room with a door that is away from treatment areas or remove them from the residence on the day of treatment.

Post-treatment

Please do not touch or disturb any traps, monitors, or stations following the service as these have been strategically placed by our pest professionals. Please be persistent in cleaning in order to maximize the success of your service.

FAQ

Do you use chemicals to kill rodents? We may use a combination of rodenticides, trapping devices, and monitors according to the product label requirements. All of these products have been registered and EPA approved.

How long before I see results? Each home will have a unique treatment plan and rodent behavior can vary from home to home. With that being said, please be patient and allow our pest professionals to use their expertise to find the best solution.
